## River front Studio Apartment and Gallery

Bright renovated river front studio apartment and gallery shop overlooking the traditional bustling village of Ferragudo poised between the quay's edge on one side and the cobble-stoned pedestrian street on the other.

This special property underwent a complete renovation in 2018 to transform the interior first floor to a bright open and warm studio upstairs apartment. Award-winning architect Marlene Uldschmid has taken special care to capture as much light as possible from windows, sky lights, installations, white walls and bright wooden flooring. From the terrace you can watch the vibrant pedestrian activity on the south side, or the fisherman docking their boats in the sleepy bay on the North side.

On the ground floor the gallery/shop is accessed either by the busy pedestrian street or on the bus
