Rustic Manor in Boliqueime centre

In the picturesque village of Boliqueime right next to the church we find this beautiful house built in 1898. One of the first manor houses built around the church square maintaining original features blended with tasteful details.

The ground floor is mostly open plan and divided by exposed brick arches. It has the original stone floor, vaulted ceilings and stone door and window frames.

A separate access door leads to an old stone staircase up to the first floor with 2 bedrooms, a shared bathroom, a beautiful lounge with closed fire place and exceptional views over the church square, an office, a dining room and the kitchen. Off the kitchen there is a BBQ terrace perfect for outdoor cooking and al-fresco dining
